

Safe & Together and the Family Law Courts

Friday 6 May, 9am – 10:30am

Join us for this online multi-disciplinary event for non-legal and legal practitioners, government agency and community sector support workers

Presenter: David Mandel, Executive Director,
Safe & Together Institute, USA

The training will provide practitioners with practical and relevant best practice approaches to enhance practice and safety where domestic and family violence is identified as a concern. David will challenge practitioners and provide language to ensure you never talk about it being a victim's fault that they have failed to keep themselves or the children safe by not leaving the relationship or by any other decision they have made. David will also discuss how practitioners can draft orders and documents to ensure the person using violence is responsible for their behaviour and encourages an awareness that there is no excuse for domestic and family violence.
